

Quonset Development Corporation

Water Department

Conservation Management Policy

The policy of the Quonset Water Department is to minimize any potential stress on our water supply aquifer, and our water system peaking demands with modifying outside watering activities. Outside water practices will be based on drought conditions as reported by the RI Water Resources Board. This can be accomplished simply by modifying all outside watering activities, as outlined below

Outside Watering Policy, based on Conditions as determined by the WRB Drought Steering Committee. See RIWRB Drought Condition report link.
<http://www.wrb.state.ri.us/drought.htm>

a. Normal & Drought Advisory

Annual Notice No Daytime Watering May through October
(Night time watering only 8:00PM – 6:00 AM)
