

## RECORD DRAWING ATTESTATION FORM

Record drawings indicate instances where the as-built condition differs from the design plan. QDC's Technical Review Process includes the review and approval of record drawings, per section 4.15(G)1 of the QDC Development Package.

In the case where the as-built conditions do **NOT** differ from the design plans, the design engineer and/or surveyor of record shall submit this **RECORD DRAWING ATTESTATION FORM**. This form shall be stamped and signed by the appropriate professional registered in the State of Rhode Island informing QDC that the final approved design plans were built to specifications within the tolerances included in **SPECIFIC FEATURE REQUIREMENT'S** of the **RECORD DRAWING REQUIREMENTS** document.
